

6th May, 1965.

H.E. Paterson Esq.,  
University College of Rhodesia and Nyasaland,  
Zoology Department,  
Private Bag 167 H,  
SALISBURY,  
S. Rhodesia.

Dear Mr. Paterson,

I enclose the main alterations I have made in the text of the Monograph article. These include reference to other egg-measurements, a more comprehensive assessment of the causes of sterility and a modified table IV. In addition, I have included a table of contents and re-arranged the sections as shown. I also enclose copies of Figs. 1-11.

I hope the eggs arrived safely and hope you can provide species C in the near future.

Yours sincerely,

G. Davidson  
Reader in Entomology  
as applied to Malaria.
