11th Feb. 1971

Dear George,

I wonder if you would be so kind as to send me a reprint of your paper: "Application of new procedures to control: Genetic control of Anophelines" from Misc. Publ. Ent. Soc. America 7(1), pp 118-29? I do not seem to have reprints of the 2 papers of Chellar (1969a & b) either. I should be glad of copies of these as well, if they are still available.

I have heard nothing of ~~any~~ action following our meeting at the Ross Institute. What is the position at present? Has a submission been made to the Bull. of Zool. Nomenclature?

Kind regards to you
& Joan Bryan.

Yours sincerely,

Angus Patterson.
